Thanks Deb

I'll reorder things and make those edits – I'm just waiting for the superfund task force update talking points, and then I'll send you the final materials.

CTDEEP Award - Bob Cianciarulo flagged for us that CT was receiving this award and it was being announced at the ASTSWMO meeting in Bethesda, MD on 10/25. Beth Deabay from our Region will be at the meeting. Since the timing seemed right, I was giving you a heads up in case you wanted to congratulate CT tomorrow. Massachusetts is also one of the 11 other states that have already received the award in past years.

Alex, I presume you are covering realignment, PFAS, Title VI and that I'll cover knowledge retention pilots, state scientist visits, citizen science, and HABs. Sean will cover smart sectors. Does that make sense?

Kate,

Please reorder topics per above.

I took a look at what you gave me so far and I have a few comments:

1. Citizen Science – missing list of state invitees
2. Title IV should be changed to Title VI.
3. What is the origin of the CTDEEP award?

Thanks...Deb
